Derestricting Datasets
How to License Research Data

Alex Ball
DCC/UKOLN, University of Bath

25 February 2011
Outline

Why license research data?

Licensing options
  Creative Commons
  Open Data Commons
  Open Government Licence
  GILF/AusGOAL Licences
  Design Science Licence
  Public Domain

Mechanisms for Licensing Data

Further Information

Group Exercise
Why license research data?

The open data argument

▶ To allow the data to be used in new ways: comparative studies, data mining, interdisciplinary studies, ‘citizen science’…
▶ To permit greater scrutiny of research
▶ To raise standards of documentation
▶ To protect researchers from challenges
▶ To accelerate community-wide learning from experience
▶ To increase efficiency
▶ To increase impact

The pragmatic argument

▶ To provide clarity
Types of licenses

- Contracts
- Pure licences
- Waivers
Licensing questions

1. Do you need to make a choice?
   ▶ Institutional policy
   ▶ Data archive policy
2. Would a standard licence suffice?
3. Do you need to write your own licence?
4. Do you need more than one licence?
Multiple licensing

Development Community
- Copyleft
- Licence
- Licence fees

Development Partners

ND No Derivatives
Creative Commons

BY Attribution

Attribution stacking

NC Non-Commercial

What counts as commercial?

SA Share Alike

Reduces interoperability

ND No Derivatives

Severely restricts use
Open Data Commons

- Attribution Licence (ODC-BY)
  - 🔗 / ⬤
- Open Database Licence (ODC-ODbL)
  - 🔗 / 🔗 /

- Explicitly distinguishes database structure from contents, and deriving visualisations from deriving new databases.
Open Government Licence

- Attribution
- Terminates on illegal/misleading usage of data
- Can only be used for public sector data
- Cannot be used for logos, insignia, personal data, otherwise encumbered data
- Does not distinguish database structure from contents
Six Australian CC Licences

Restrictive Licence

- Contract template: standard legal code modified using schedules
- Expiry date
- Geographical restriction
- Different copying/distribution terms for confidential and ordinary data
- Licence fees
- Other restrictions and permissions
Design Science Licence

- Attribution and Share Alike ♂️
- Distinguishes source data from visualisations
- Does not distinguish database structure from contents
- Redistribution requirements
Public Domain

- Creative Commons Zero (CC0)
- Open Data Commons Public Domain Dedication and Licence (ODC-PDDDL)
- Open Data Commons Database Contents Licence (ODC-DbCL)
- Community norms?

Group Exercise

How would you license the following datasets?

1. Power consumption at your house
2. Temperature and humidity readings from a well-sited Stevenson Screen
4. Anonymised genomic/proteomic data
5. Amounts of carbon and energy embedded in building materials
6. Recordings, transcriptions and annotations of simulated design meetings
